Dan,

TNX VRY MUCH For the QSO. Very Strange Condx. Beam Heading was appox. 15° N of W. Always enjoy working school stations. I've been pondering the thought of forming a Highschool/College Station net. maybe even issue a W.A.S. For college stations. Drop me a line on what you and you group think. maybe we could get something started. Well 73 es enjoy.

Doug KoDR.
